

THE CARDEROCK SPRINGS EDUCATIONAL FOUNDATION STEM PROGRAM

Enroll your child in one of the free STEM sessions taught by CSES teachers and Foundation-funded! Classes meet once per week for six weeks.

Four sessions will be offered across the academic year. Each session will focus on the following STEM principles:

- **Open-ended problem-solving**
- **Hands-on learning – no screens**
- **Application of design method**

Students should only sign up for one session as the curriculum is the same across all sessions. (Note: day of the week and times *may* vary for different sessions.)

Registration is now open for Sessions 1 and 2 through A to Z. Session 1 begins September 26!
